WASH MANAGEMENT SYSTEM

- Remotely monitor the status of up to 24 individual inputs via the internet. Use any web browser to control the Anztec ASM-1000 with the software application that's embedded into it. Check levels and status either locally or remotely.
- The ASM-1000 has fully isolated inputs for connection to devices such as coin and token acceptors or wash start signals. Channels can also be configured as triggers to warn of fault conditions or alarms.
- Configure users with different privilege levels depending on their roles and duties.
- Receive reports and alerts via email and/or Pushover phone app. Download performance data to any spreadsheet application.
- Rolling daily, weekly and monthly totals for each input allow for performance tracking of individual pieces of equipment. Real-time current totals show exactly what should be present in cashboxes at any given time.
- View the status of the inputs locally via the front panel indicators on the ASM-1000 for instantaneous feedback on individual inputs. Additional configuration information is displayed via an easy to read

The screenshot displays the ANZTEC WASH MANAGEMENT SYSTEM web interface. It features a navigation menu on the left with options like 'Webserver Home', 'Configuration...', 'Meters', 'Cash Clearances', 'Alerts', 'User', 'Password', and 'Current User: admin'. The main content area is divided into two sections:

Enabled Channels

Channel No.	Channel Label	Channel Type	Channel Value	Channel Group
